

Leisure Migration

A Sociological Study on Tourism

Tourism Social Science Series

Jozsef Borocz

Jafar Jafari

About the Book

The book opens with an account of recent developments in the economic, political and cultural sociology of international tourism and goes on to analyse the relationships between international tourism and the broad economic determinants of the world system. The book aims to understand "leisure migration" in two principal contexts: the socio-economic hierarchies of society, and the legacy of east-west political alliances. This novel theoretical synthesis combines data at the global, continental, and regional levels of tourism, focusing particularly on Austria and Hungary - one of the most exciting areas of Europe - where the social, political, cultural and economic boundaries of the emerging European integration are being contested and redrawn today. In adopting an eclectic research strategy, including historical narrative, content analysis, linguistic history, statistical modelling, and fieldwork observation, the book breaks new ground with regard to the empirical material it covers, and is a timely and relevant contribution to the advancement of this debate.
