

Civil Engineering Heritage

Wales and West Central England

Roger Cragg
W. J. Sivewright

About the Book

First published in 1985, this new edition of Civil Engineering Heritage: Wales and West Central England covers Wales and the Western part of central England from Cheshire in the north to just south of Bristol. This book has been substantially revised and updated to provide a much greater spread and depth of coverage, and describes many examples of our civil engineering heritage. In recent years, people have become more aware of the value of their local and national heritage and what the civil engineering profession has done over the years for the environment, the economy, and the use and convenience of man.

The book is heavily illustrated and contains location maps and notes on access to sites, and the achievements of such famous names as Thomas Telford, James Brindley, George and Robert Stephenson, Isambard Kingdom Brunel and many others.

This guide is part of a series of Heritage titles issued by the Panel for Historic Works of the Institution of Civil Engineers.
