

Infrastructure Planning

James V. Parkin
Deepak Sharma

About the Book

This book introduces engineers to the principles and procedures necessary for infrastructure planning in rapidly developing regions. It covers the technical methods required in planning for infrastructure provision from base-line studies and problem definition through to the specification for a set of projects. The book also discusses the political factors that affect the decision-making process and demonstrates, through case studies, how the technical and political perspectives come together in the finished plan.

Format: Hardback

Pagination: 280
