

Current and Future Trends in Bridge Design, Construction and Maintenance 2: Safety, Economy, Sustainability and Aesthetics

Institute of Civil Engineers (corporate)

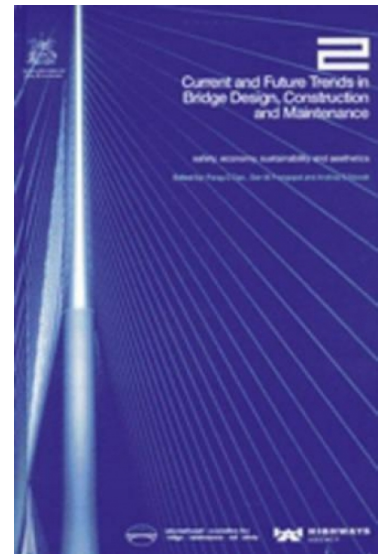

Highways Agency and International Association for Bridge Maintenance and Safety (corporate)

About the Book

The Institution of Civil Engineers has organised a series of conferences to celebrate, at the start of the New Millennium, the enormous achievements made in the field of bridge engineering in recent years.

This volume of papers from the second of these conferences, held in Hong Kong, encompasses the state-of-the-art in bridge design, construction, maintenance and safety assessment. It includes papers on major bridge schemes, both completed and under construction, and on innovative approaches used in various parts of the world. It also looks at local and regional projects and bridge related issues.

The wealth of information contained in this publication will be of interest to bridge consultants and contractors, practising engineers, researchers and bridge owners, both local and international.
