

Health and Safety in Construction

Guidance for construction professionals

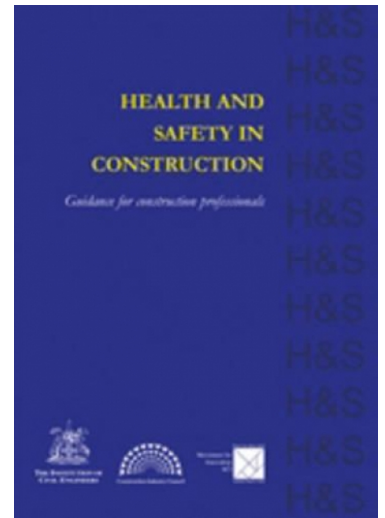

John Barber

About the Book

All civil engineers and construction professionals concerned with the construction process have both professional and legal duties to take care, not only of their own health and safety at work, but the health and safety of others who might be put at risk.

Health and Safety in Construction offers clear guidance on the responsibilities of construction professionals for health and safety in construction. Construction professionals need to work together to ensure consistently high standards and this essential guide will help achieve a measured and effective response to this challenge.

Health and Safety in Construction is an invaluable resource for the client, designer and contractor working together on construction projects.
