

Research in Strategic Management and Information Technology

Research in Strategic Management and Information Technology

N. Venkatraman
John Henderson

About the Book

This second volume in the series, "Strategic Management and Information Technology" presents a coherent set of papers that deal with the challenges of leveraging information technology for designing inter-organizational relationships. Instead of assembling a set of papers that are loosely connected to the broad theme of strategy and information technology, this volume presents a well-knit compendium of papers on a coherent topic.
