

Loex of the West

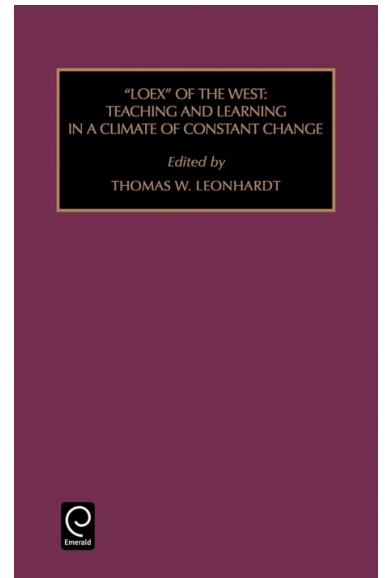

Teaching and Learning in a Climate of Constant Change

Foundations in Library and Information Sciences

Thomas W. Leonhardt

About the Book

This is an examination of the technological advances in the field of library and information technology. It covers topics such as coping with multiple database personalities, the Internet and teaching the library and electronic resources on television. It aims to contribute to all those trying to traverse the "electronic landscape" and keep in touch with this "climate of change".
